SKILLS FOR
TRANSITION TO
CIRCULAR
ECONOMY

<https://www.facebook.com/skillcircle2/>

Transition to **circular economy** is a complex process as it requires system-redesign on all levels of the society, creating the need for new thinking and competencies. Therefore, the SkillCircle project proposes to use real life situation - *best practice* – examples, in order to ease the learning process of the target group members on their “transition journey”.

► **FOR WHOM:**

- Participants in vocational education and training (VET) with lower educational level and with migrant/ refugee background
- VET trainers, VET education and training providers

► Key words

- Circular economy thinking
- Digital storytelling
- Skills for the future
- Changing the mindset
- Sustainable jobs
- Social integration • Low carbon
- Resource efficient economy

SKILL CIRCLE DEVELOPS:

- Digital stories of circular thinking and acting from different sectors of industry in Europe
- Curriculum and Training Kit development - aiming to drive a change of mindset of participants in vocational education and training (VET)
- Online Learning space - for developing circular thinking skills

► **THE Skill Circle PROJECT AIMS TO:**

- Analyze the specific training needs of participants in vocational education and training (VET), related to circular economy
- Explore current practices of circular thinking and acting from different sectors of industry in Europe
- Develop and test a training program to support the change of mindset of participants in vocational education and training (VET)
- Develop online training materials (including animated tutorials) specifically targeted to people with lower education level about circular economy thinking
